USER PERSONA

Defining the Core Problem & Target User

Bridging the gap between earning and prowinp wealth for the 'Urban Aspiring' demographic.

The Core **Problem**

Decision fatigue from fragmented financial data
High friction in manual expense tracking tools
Inability to translate advice into consistent habits

The Target User

Primary: 'The Urban Aspiring Earner'—22-30 year olds in Tier 1 cities earning 740k-780k, currently relying on YouTube or parents for advice.

Current Alternatives

Zerodha Varsity for learning (but lacks execution) Manual Excel sheets (too time consuming) Transactional apps like CRED or Paytm

MARKET RESEARCH

AI-Led Market Intelligence

Analyzing the competitive landscape and identifying the critical 'Advice-to-Action' gap.

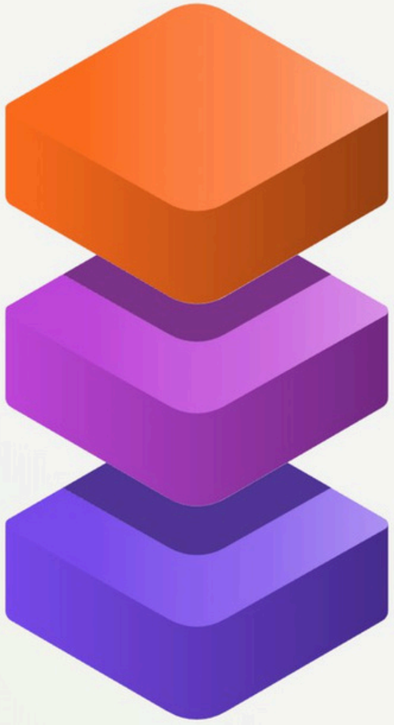
Competitor	Region	Core Focus	Primary Value
INDmoney	India	Investment Tracking	Net Worth view
Jupiter	India	Neo-banking	Integrated Savings
Cleo	Global	Conversational AI	Gamified Budgeting
Wally	Global	Expense Automation	AI Insights
Mint	Global	Aggregator	Budget Tracking

AI Thinking & Strategic Process

Leveraging advanced models to refine the product value proposition and identify non-obvious insights.

Tool **Stack**

Utilized **Perplexity AI** for real-time market data and **Claude 3.5** for persona behavioral synthesis.



Iterative **Refinement**

AI assisted in shifting the focus from 'Net Worth tracking' to 'Transactional Micro-nudge' strategy.

Key **Insight**

Finance isn't a math problem; it's a habit problem. The AI must act as a **Concierge**, not a Dashboard.

Rapid Validation Experiment

A low-fidelity test to validate the appetite for AI-driven financial coaching.

The MVP Test

Launch a 'WhatsApp Finance Concierge' where an AI provides daily spend summaries and saving nudges.

Target Cohort

50 professionals in Bangalore/Mumbai earning Y50k+ with at least one active credit card.

Success Metric

40% 'Savings Action' rate (users moving money to savings after a nudge) over 14 days.
